# Access Control by Clear2there

schools, businesses,
government buildings
and more

Why Access Control?

- Business customers may be a small % of access lines but for many represent ~50% of revenue

- Applicable to virtually all business and government customers

- Strong lock-in opportunity for business data lines

Hybrid Cloud Solution

- Readers are PoE TCP/IP computers
  - Simplifies wiring
  - Enhanced flexibility
- No servers, no panels
  - Simpler install, lower cost
  - No centralized point of failure
  - Fallback mode switches to reader's local database
- Access control database stored in Viewbiquity
  - No lost database on premises HD failure

Viewbiquity Integration

- Integration with Viewbiquity Rules Engine
  - Proactive alerts, email snapshots etc.
  - Fine grained control through profiles, schedules
  - Leverage integration with other devices
    - Alarm panels, thermostats, video cameras, lighting etc.
- Control and monitor anywhere, on any device
  - Rooms and Locks apps
- Logs of all events

Required SP Infrastructure

- **None**…. you've already made the investment!
  - Viewbiquity service for your **existing** Viewbiquity App Server
  - Integrates with the Viewbiquity Edge Gateways and VPN router already at your data center
  - Only costs to Service Provider are the readers, accessories and Viewbiquity end user service

Coming Soon
